Ronacrete Far East Expands the Monitoring and Control of our Green House Gas Emissions to our Production Facility

Since 2013 Ronacrete has undertaken to monitor, control, report and where possible reduce our green house gas emissions at our primary sites in Wanchai, the New Territories in Hong Kong and in now in our factory in Nansha, China.

The monitoring & reporting system was initially set up for the office and warehouse in Hong Kong with the support of an independent consultant in accordance with the Hong Kong Carbon Accounting Guideline issued by EPD. Since then we have expanded the system to include our factory in Guangdong in order to provide a more complete picture of our environmental impact and to facilitate the setting of controls and goals for the coming year.

Ronacrete's Combined Carbon Footprint (GHG Emissions as CO₂ equivalent)

Total GHG Emissions as KgCO₂e/sq.ft for Office, Warehouse and Production Facility.
